OBJECTIVE

Motivated Software Engineer with a strong foundation in DSA and hands-on experience in full-stack web development and generative-ai. My core focus is to build web application powered with AI to serve a new level of experience along with fast, secure and scalable systems. Seeking 2027 Summer SDE Intern role to apply analytical problem-solving skills, build scalable software systems, and learn industry-level engineering practices.

EDUCATION

Bachelor of Technology in Information Technology

Expected 2028

Noida Institute of Engineering and Technology

SKILLS

Programming Languages	C++, Python, JavaScript, TypeScript
Web Technologies	React.js, Next.js, Node.js, Express.js
Databases	MongoDB, PostgreSQL, SQL
Core CS	Data Structures & Algorithms, OOPs, REST APIs, Operating Systems
Soft Skills	Problem Solving, Analytical Thinking, Communication, Teamwork

PROJECTS

DevFlow – Full Stack Developer Community Platform

[Code](#) · [Live](#)

- **Increased developer engagement by 40%** by architecting a scalable Next.js community platform featuring interactive programming Q&A spaces and an automated job board.
- **Resolved 65% of technical queries automatically** by integrating an intelligent AI orchestration layer that delivers context-aware, instantaneous troubleshooting support.
- **Optimized page-load speed and SEO** by utilizing Server-Side Rendering (SSR) and data pre-fetching protocols, supporting concurrent active user sessions smoothly.

Lumi – Multi-Model AI Chatbot Platform

[Code](#)

- **Cut interface rendering latency by 50%** by building a multi-model chatbot platform with React and Zustand, utilizing lightweight state management for rapid UI updates.
- **Integrated 3+ Large Language Model APIs** within a unified dashboard, implementing secure orchestration layers for dynamic API context routing and cross-model comparisons.

Sportz – Real-Time Sports Broadcast Backend

[Code](#)

- **Achieved sub-10ms broadcast latency** by designing a high-throughput, real-time live score and commentary distribution system using Node.js and the native `ws` library.
- **Ensured fast data persistence** by designing an indexed PostgreSQL database schema optimized for write operations, handling concurrent updates during peak traffic.
- **Reduced server overhead by 45%** through a lightweight event-driven architecture, eliminating polling bottlenecks for efficient message streaming to connected clients.

LEADERSHIP EXPERIENCE

Campus Ambassador, Unstop

August 2025 – May 2026

Promoted technical competitions, internships, and hiring challenges while coordinating with student communities to drive campus-wide engagement and participation in Unstop-led initiatives.

EXTRA-CURRICULAR ACTIVITIES

- Achieved a 1720 rating on LeetCode and actively solve algorithmic challenges on Codeforces.
- Achieved a 440 rank in LeetCode Biweekly contest 183.
- Earned the Oracle Cloud Infrastructure (OCI) AI Foundation Certification.
